

- Glass fibre tape for filling joints in plasterboard and concrete.
- Extreme adhesion.
- The tape does not absorb water.
- For use on both ceilings and walls.

Product information

FibaTape Xtreme is an orange, self-adhesive glass fibre tape. Used to fill joints in plasterboard and concrete, and to repair holes in walls. The self-adhesive design makes it easy to use on both ceilings and walls. The glass fibre tape is strong and can be used on joints with both straight and rounded edges.

Use

The product is recommended for use in a filler approved in accordance with EN 13963.

Instructions

Use FibaTape Xtreme for joint filling on plasterboard and concrete. Mount the glass fibre tape over the joint and then apply filler to achieve the desired result.

The glass fibre tape is self-adhesive, making it easy to mount.

The tape is normally applied directly to the joint, but it can also be used after a thin layer of filler has been applied to the joint using a filler approved in accordance with EN 13963.

Storage

Store in a dry place.

Technical Data

Roll length: 90 m

Width: Approx. 48 mm

Packaging: Carton of 12 rolls

Storage: Dry

Area of application: Indoors
